Subject Index

- Antibodies (monoclonal):
 - bovine, 29
 - caprine, 159
 - murine, 149
- Antigens:
 - BoLA, 317, 361; class II, 17
 - ELA class I, 103
 - cell surface, 71
 - lymphocyte, goat, 159, 261
 - OLA, 187
 - red cell, 29
- Blood groups:
 - BoLA and M, 361
 - cat, DNA fingerprints, 1
 - horse, 285
 - linkage with protease inhibitor, 311
 - pig, linkage analysis, 279
 - rhesus monkey, 337
- Casein, new variant in cow milk, 269
- Cattle:
 - antibodies, 29
 - antigens, 17, 71
 - BoLA, expression in embryo, 317; and M blood group, 361
 - casein variant, 269
 - haemoglobin, 133
 - hybridomas, 29
 - linkage, 311
 - lymphocytes, 17
 - relationships between breeds, 249
 - RFLPs, 213
 - thyroglobulin gene variation, 41
- Chicken, MHC and sex effects, 343
- Clones:
 - BoT4⁺, 17
- DNA:
 - fingerprints, dogs, cats, 1
 - pig skeletal muscle, 233
 - restriction pattern differences, 241
- Dog:
 - cell surface polymorphism, 149
 - DNA fingerprints, 1
 - new plasma protein polymorphism, 297
 - postalbumin polymorphism, 119
 - transferrin polymorphism, 143
- Electrophoresis:
 - ISO-DALT, 167
 - isoelectric focusing, 143, 269
 - patterns in different gels, 51, 125
- 2D, 197, 297
- Embryo, segregation of serotypes, 317
- Erythrocyte:
 - polymorphism, diaphorase, 273; potassium, 371
- Esterase:
 - locus, rabbit, 257
 - polymorphism, 143
- Evolution:
 - globin, 133
- Frequency:
 - gene, dog plasma protein, 297
 - protease inhibitor alleles, 181
- Genotype determination, 337
- Glucose phosphate isomerase, 233
- Goat:
 - diaphorase polymorphism, 273
 - haemoglobins, 223
 - lymphocyte antigens, 261
 - potassium polymorphism, 371
 - production of alloantibodies, 159
- Haemoglobin:
 - cattle, 133
 - goat, 223
 - rabbit, 257
 - sheep, 241
- Histocompatibility (MHC):
 - cattle, 17, 71, 317, 361
 - chicken, 343
 - goat, 159, 261
 - horse 81, 103, 317, 323
 - sheep, 187
- Hormone, growth (RFLP), 213
- Horse:
 - ELA region molecular genetics, 323
 - gait, 285
 - lymphocyte antigens, 81, 103
 - postalbumin polymorphism, 119
 - protease inhibitor alleles, 167, 181
- Immunoglobulin heavy chain allotypes, 351
- Iron, concentrations in plasma, 51, 125
- Isoelectric focusing, 269
- Linkage:
 - blood group, pig, 279; cattle, 311
 - disequilibrium, 63
 - erythrocyte proteins, 257
 - serum protease inhibitors, 63, 351
 - plasma postalbumin, 119

- Loci:
 - ELA, second locus, 103
 - horse, MHC, 103; blood groups, 285
 - hypervariable, 1
- Lymphocyte:
 - antigens, horse, 81, 103; goat, 159, 261
 - clones, 17
- Mapping, gene, 103, 167
- Markers:
 - biochemical, Spanish cattle, 249
 - cattle RFLPs, 213
- Minisatellite probes, 1
- Monkey (rhesus), G blood group, 337
- Mouflon, 241
- Mouse:
 - hybridomas, 29
 - monoclonal antibody, 149
- Nucleotide diversity, 41
- Phytohaemagglutinin wattle response, 343
- Pig:
 - blood group linkage, 279
 - cDNA clone, 233
 - postalbumin polymorphism, 119
 - protein phenotyping, 197
 - serum protease inhibitor linkage, 63, 351
- Plasma:
 - iron concentrations, 51
 - postalbumin polymorphism, 63, 119, 197, 297
 - protein phenotyping, 197
- Polymorphism:
 - biochemical, Spanish cattle, 249; rabbit, 257;
 - cow milk casein, 269
 - cell surface determinant, 149
 - goat erythrocytes, diaphorase, 273; potassium, 371
 - haemoglobin, goats, 223; sheep, 241
 - plasma proteins, dog, 297
 - postalbumins, dog, 119, 297; horse, 119; pig, 63, 119, 197
 - protease inhibitors, 63, 197
 - restriction fragment length, 41, 213, 323
 - transferrin, 125, 143
- Postalbumin polymorphism, 63, 119, 197, 297
- Prolactin:
 - locus (RFLP), 213
- Protease inhibitor:
 - horse alleles, 167, 181
 - linkage, pig, 63, 351; cattle, 311
 - phenotyping, 197
- Protein:
 - casein variant, 269
 - plasma, dog, 297
 - primary structure, 133
- Rabbit:
 - erythrocyte protein linkage, 257
 - transferrin, 51, 125
- Recombination:
 - horse antigens, 103
 - pig protease inhibitors, 351
- Relationships, Spanish cattle breeds, 249
- Restriction fragment length polymorphism:
 - cattle, 41
 - horse, 323
 - pig, 233
 - sheep, 241
- Rhesus monkey, G blood group, 337
- Segregation, BoLA serotypes, 317
- Serotypes, BoLA expression, 317
- Sex effects and MHC in chickens, 343
- Sheep:
 - MHC, 187
 - restriction patterns, 241
- Thyroglobulin gene variation, 41
- Transferrin polymorphism, 125, 143
- Variation:
 - bovine thyroglobulin gene, 41
 - horse gait, 285
- Wolf, transferrin polymorphism, 143
